Aşağıda göstərilən struct-ları yaratmaq

```cpp
struct Date
{
    short day;
    short month;
    short year;
}

struct Student -i yaratmaq
{
    int id = 0;
    char* name = nullptr;
    char* surname = nullptr;
    char* city = nullptr;
    Date birthDate;
    float score = 0;
}

struct Group
{
    char* name = nullptr;
    Date startDate;
    Student** students = nullptr;
    int studentSize = 0;
}
```

```
struct Academy -i yaratmaq
{
    char* name = nullptr;
    Date startDate;
    Group** groups = nullptr;
    int groupSize = 0;
}
```

Aşağıda göstərilən function-ları yazmaq

1) void showStudent(Student) - adinda funksiya
2) void showGroup(Group) - adinda funksiya
3) void showAcademy(Academy) - adinda funksiya
4) void: score-u 50-den cox olan teleberi gosteren funksiya
5) void: yashi 18-21 arasi olan telebeleri gosteren funksiya
6) void: addStudentInGroup(Group, size, Student)
7) void: addGroupInAcademy(Academy, size, Group)
8) Student* createStudent()
9) Group* createGroup()
10) Academy* createAcademy()
